

# Oguljema! Yusupova

I am a graduate of Moscow Medical College's Nursing Department, and I worked in the medical field for 1 year. However, due to my interest in computer science and technology, I wanted to gain more knowledge and expertise in this field. Therefore, I continued my educational journey in the field of software development. During this process, I acquired comprehensive knowledge about technologies such as C#, OOP, MS SQL Server, HTML, CSS, Bootstrap, Javascript, Generic structures, ORM and Linq Queries, Entity Framework Core, Asp.Net Core MVC Application Development, Asp. Net Core Web API Application Development, and React. I am ready to bring my interests and skills in software development and technology to the business world. I am eager to contribute to various projects in line with the needs and to continually improve myself by using my curiosity for new technologies.
